Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 06 July 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-4, 6-31, 33-58, and 60-94 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Moon et al. (Moon; US 6,211,858 B1; cited and applied for the first time).

Regarding claims 1-3, 8, 16-18, 81-84, and 86-91, the entire patent to Moon plainly teaches the claimed user interface (reads on the graphical user interface of Moon) for a handheld communication device (see FIG. 1), comprising a main screen segregated into a number of screen areas (see FIGs. 3 - 6), at least one of the screen areas devoted to a system window in which a system application for displaying status icons for the handheld communication device executes (see status bar 140 in FIGs. 4 - 6), and another of the screen areas devoted to an application window in which a browser executes to display an HTML page having current or recent application information for respective user applications, which user applications may be accessed through interaction with the browser (see FIGs. 3 – 6; column 1, lines 56 – 63; and column 2, lines 13 – 29).

With respect to claim 4, see column 5, line 45 (E-mail).

With respect to claims 6, 7, and 85, Moon shows stylus 26 in FIG. 1.

Moon plainly teaches the graphic icons of claims 9 and 21.

Moon also teaches the telephone dialer and e-mail applications, and text editor of claims 10-12, 26, 27, and 92-94.

The limitations of claims 13-15, 19, and 20 are inherent to any browser and Moon teaches a browser.

FIGs. 3 and 4 of Moon clearly depict the folder menu of claims 22-25.

Claims 28-31 and 33-54 parallel claims 1-4 and 6-27 and are thus taught by Moon in the same manner.

Claims 55-58 and 60-80 also parallel claims 1-4 and 6-27 and are thus taught by Moon in the same manner.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
6. Claims 5, 32, and 59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Moon, as applied above, in view of Hastrup (US 6,223,059 B1; cited and applied for the first time).

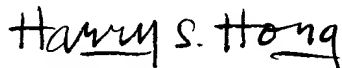

Moon is silent with respect to the application information comprising one or more upcoming events or to do items. However, Hastrup clearly teaches such calendaring feature for a user of a handheld communication device (see column 3, lines 16 – 19 and column 4, lines 15 – 24). Therefore, it would have been obvious even to one of ordinary skill in the art at the time of the invention to incorporate the calendar function into the device of Moon as taught by Hastrup. The advantages of a calendar function in PDAs are also well known.
